## WORKSHOP 1

### The Inclusion Diamond, eye for diversity

As social professionals we deal with a great diversity among our clients. It is the challenge of an inclusive society, in which everyone can participate and no one is excluded, to take account of this diversity. To support our clients towards inclusion and to understand the challenges they encounter in this process, it is necessary for us to have a number of basic competencies. In the Netherlands social workers use the Inclusion Diamond as a guide in their work. The Inclusion Diamante contains practical tools aimed at diversity factors such as gender, religion, ethnicity, sexual orientation, age, disability, mental disorders, poverty, being homeless and labor force participation. During this workshop I will tell you something about these factors from the perspective of Dutch culture. Also we will play games and compare our values when it comes to these factors.
