WORKSHOP 2

Students, older persons and Healthcare Technology

In this workshop you learn more about older persons in the Netherlands and current changes in healthcare and the role technology plays in the changing work field and how this stimulates inclusion of elderly people. We will present some examples on our own vocational education (university of applied science) on this topic. And moreover, you will experience a couple of Healthcare technologies yourself! So if you want to learn more about the way Healthcare technology is used in the Netherlands, how we educate our work field and students on working with all kinds of technology AND most important EXPERIENCE it yourself: come and visit our workshop.

Lecturer: Kitty van der Made - Bogaerts, Avans University of Applied sciences, School of Social Studies, Netherlands & Maite Mallentjer, Artesis Plantijn Hogeschool Antwerpen, Belgium
